

Smart Video Doorbell: Netatmo offers new transformers for easy installation regardless of the existing set-up

London UK, 15 February 2022 – The Netatmo Smart Video Doorbell has been available for sale since September 2020 and was originally designed to replace an existing wired doorbell and chime. Now, thanks to two transformers specially designed by Netatmo, the Smart Video Doorbell is compatible with a wide variety of installation set-ups — including those without an electrical connection.

Two types of transformers are available from today on <http://shop.netatmo.com/>, as a single item or in a pack. The first is a Plug-in Transformer, which can be plugged into a standard indoor wall socket. All the user has to do is drill a hole in the wall for the cable to pass through. The second is an In-wall Transformer, which requires a capable DIYer or professional to install. Both transformers enable the Smart Video Doorbell to be used without a chime. When a visitor rings the doorbell, the user is alerted on their phone — whether they're at home or away. If they want to hear the doorbell ring in their home, they can use their smart speaker as the Smart Video Doorbell is compatible with Amazon Alexa, Apple's Siri and Google Assistant.

With these transformers, Netatmo enables more users to benefit from a mains-powered Smart Video Doorbell. Once installed, there are no batteries to worry about.

The Netatmo Smart Video Doorbell allows users to see who is at their door and answer it from anywhere. When someone rings the doorbell, the user is alerted on their smartphone and can then chat with their visitors. The Doorbell also means users can secure the entrance to their home, as it alerts the user in real-time if it detects a person loitering outside their front door. There are no subscription fees and the data is fully secure, thanks to an integrated microSD card. Lastly, HomeKit compatibility empowers users to create scenes with other smart products in the home.

The Netatmo Smart Video Doorbell is also easy to install as a replacement for a wired doorbell. It suits most electrical installations (8-24 V & 230 V).

New features of the Smart Video Doorbell

The Smart Video Doorbell has also been updated with new features;

- Integration of a sound that can be heard through the speaker so that someone pressing the doorbell can be assured that it works
- Option to temporarily disable the doorbell chime (do not disturb mode) or permanently disable it.
- Improved AI, especially for recording before a person arrives at the Video Doorbell.

The Netatmo Smart Video Doorbell transformers are available on the Netatmo e-Shop for £19.99, and they will soon be available at the usual sales outlets. The transformer is also included as part of a bundle with the Netatmo Smart Video Doorbell for £279.98.

About Netatmo

Netatmo is a leading smart home company that creates simple and smart products for a safer, more comfortable home.

Since its launch in 2011, Netatmo has been committed to designing products that are:

- 100% inclusive: no subscription fees or extra costs
- 100% secure: data protection and privacy guaranteed
- 100% upgradeable: free upgrades and features added regularly

To date, Netatmo has launched 13 smart home devices and accessories. Helpful and easy to use, these products make everyone's daily life easier while improving well-being at home.

In addition to its consumer product lines, the company collaborates with key leaders of the building industry through its "with Netatmo" program to develop smart solutions that integrate into the home's infrastructure.

In 2018, Netatmo joined the Legrand Group, a global specialist in electrical and digital building infrastructures.

Netatmo, same home, just smarter.
